

Gatsby Security Policy

Securities offered on Gatsby are offered and traded through ViewTrade Securities, Inc. an SEC-registered broker-dealer and member of FINRA and SIPC, which means stocks and options in your brokerage account are protected up to \$500,000 (including \$250,000 for claims for cash). For more details visit the websites of FINRA and SIPC, and for more information check out [our broker check](#).

Gatsby uses industry-standard best practices in security and data protection, to ensure that we keep your account protected and provide you with a great trading experience. Some of these practices include:

- All sensitive information that you share with Gatsby, including your password and all personally identifiable information is stored on industry-standard encrypted servers and transferred via HTTPS (Hypertext Transfer Protocol Secure).
- All employees with access to personally identifiable information will be subject to a background check and fingerprinting.
- Your banking credentials are encrypted and inaccessible to Gatsby after verification.
- The app requires user passwords be at least 8 characters, with at least one lowercase, uppercase, and numeric.
- Gatsby logs and monitors activity to track potential attacks.
- You can protect your account in the app with either a pin code for access, facial recognition, or fingerprint depending on your phone's capabilities.
- For more information on our brokerage and clearing partners, see [here](#) for Apex Clearing and [here](#) ViewTrade Securities, Inc.
